**LOCAL CLINICIAN RECEIVES NATIONAL  
RECOGNITION FOR PROVIDING QUALITY DIABETES CARE**

*Diabetes Recognition Program measures performance  
in key areas of diabetes care*

WASHINGTON—The National Committee for Quality Assurance (NCQA) and the American Diabetes Association (ADA) today announced that **Nomita Joshi** of **Greenville** has received Recognition from the Diabetes Recognition Program for providing quality care to **Her** patients with diabetes.

The Diabetes Recognition Program was designed to improve the quality of care that patients with diabetes receive by recognizing clinicians who deliver quality diabetes care, and by motivating other clinicians to document and improve their delivery of diabetes care. To receive recognition, which is valid for three years, **Nomita Joshi** submitted data that demonstrates performance that meets the Program's key diabetes care measures. These measures include eye exams, blood pressure tests, nutrition therapy and patient satisfaction, among others. When people with diabetes receive quality care as outlined by these measures, they are less likely to suffer complications such as heart attacks, stroke, blindness, kidney disease and amputations.

"For a person with diabetes, the right clinician can make the difference between living *with* diabetes as opposed to suffering *from* diabetes," said Richard M. Bergenstal, MD, President, Medicine & Science, American Diabetes Association. "Clinicians who earn recognition through the Diabetes Recognition Program have an established track record of providing excellent diabetes care. The list of recognized clinicians is the first place to look if you or a loved one has been diagnosed with diabetes."

To find out if your clinician has been recognized by the Diabetes Recognition Program or for further information, please visit [www.ncqa.org/dprp](http://www.ncqa.org/dprp) or email [dpr@ncqa.org](mailto:dpr@ncqa.org). To order application materials, call (888) 275-7585 or order online at [www.ncqa.org/dprpubs](http://www.ncqa.org/dprpubs).

Diabetes is a serious disease that affects the body's ability to produce or respond properly to insulin, a hormone that allows blood sugar to enter the cells of the body and be used for energy. An estimated 16 million Americans have diabetes; it is the sixth-leading cause of death by disease in the U.S. and it has no cure.

Celebrating its 20th anniversary in 2010, NCQA is a private, non-profit organization dedicated to improving health care quality. NCQA accredits and certifies a wide range of health care organizations. It also recognizes clinicians and practices in key areas of performance. NCQA's Healthcare Effectiveness Data and Information Set (HEDIS®) is the most widely used performance

measurement tool in health care. NCQA is committed to providing health care quality information for consumers, purchasers, health care providers and researchers.

The American Diabetes Association is the nation's leading voluntary health organization supporting diabetes research, information and advocacy. Founded in 1940, the Association has offices in every region of the country, providing services to more than 800 communities.
